

”The optimum choice for
therapy and training sessions”

ROPOX ERGO MULTI TABLE

COMFORTABLE SEATING FOR TWO PERSONS AT THE SAME TIME

The Ergo Multi Table is ideal for training and therapy sessions where two people are sitting facing each other. The two ergonomic curves on the table sides provide for a healthy sitting position for a user and a therapist at the same time and even in situations where the two sit at the same side of the table, the table's design caters for the best possible sitting posture for both.

As there are no cross bars under the table top, wheelchair users have no problem getting close to the table and into a comfortable position.

When you click the crescent-shaped table piece into the cut-out on the table top, the table only has a cutout on one side making it a perfect desk type table.

ROPOX MULTI TABLE
