

”A sit/stand table giving you a comfortable height and posture”

ROPOX VISION HIGH-LOW TABLE

A PRACTICAL AND BEAUTIFUL DESK

You can work either sitting or standing at the Vision High-Low, as the height is easy to adjust to your working position by a light pressure on the control switch. You can tilt the worktop and shorten the visual distance to the documents on the worktop which is convenient particularly for weak-sighted and users with reduced arm function. If you add the MagRule magnet, you can keep your documents in place even when the table top is tilted.

Vision High-Low is both elegant and advanced. It is in a simple, classic design and provides all the features you need in a modern desk. If you think the cords mess up the elegant look, the table can be supplied with a battery solution making the table completely cordless.

Furthermore, you can choose arm supports if you prefer extra support for your forearms and as an aid for a balanced position.

ROPOX VISION HIGH-LOW TABLE
